

Appendix H Material in wet wipes

This appendix applies to cloth material in wet wipes, i.e. section 12 of the criteria for cosmetics. Certificates and other documentation must be attached where this is requested.

J1 Included material

Is the included cloth material 100% bio-based?

Yes

No

Material	Percentage by weight %	Virgin raw material	Recycled raw material pre-consumer waste	Recycled raw material post-consumer waste
Viscose		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Lyocell		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Cotton		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Paper		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Is the cloth's fiber composition reported on the outside of the packaging?

Yes, attached picture of the packaging

No

J2 Raw material

For recycled raw material, state supplier and country of origin.

Supplier	Country of origin
----------	-------------------

Does all virgin forest-based raw material come from FSC-certified forestry?

Yes, attached certificate

No

No, we use cotton as raw material

Does the cotton come from organic farming?

- Yes, attached certificate
- Cultivation in conversion, attached certificate
- No
- No, we use forest-based raw material

J3 Production

Have only chlorine-free bleaching methods been used?

- Yes
- No

Have optical whiteners been used?

- Yes
- No

Substances that must not be used

- We certify that none of the following substances has been used at any stage of the production of the material: organic flourine compounds, substances on the Candidate list (echa.europa.eu/sv/candidate-list-table) as well as substances listed in Annex XIV and Annex XVII in the REACH regulation (EG 1907/2006).

J4 Marketing

Is the product marketed as biodegradable or compostable?

- Yes, attached certificate
- No

J5 Action plan

- Action plan regarding total emissions from the production of the cloth is attached.**

The action plan refers to the total emissions from the production of the cloth, i.e. from pulp to finished cloth, to air and water of chemical pollutants will be reduced over time. The action plan must contain a compilation of the five most environmentally harmful chemical pollutants that are released during production, as well as a justification for the choice of pollutants. Relevant pollutants are those mentioned in BAT. The plan should also contain at least three timed targets for how emissions are to be reduced. The licensee must annually follow up and, if necessary, update the action plan.

- Action plan regarding waste of cloth material is attached.**

The action plan refers to how cloth waste material from production of wet wipes should be reduced over time. The amount of waste that the production of wet wipes produce should be calculated and there must be a plan regarding how the amount of waste should be reduced or be reused as raw material.
